

Panel on Intellectual Entrepreneurship:

What can business teach us about seeding and nurturing innovation?

The second of three core events sponsored by The Graduate School

Douglas Hansmann

Cofounder and Chief Operating Officer of EKOS® Corp. Dr. Hansmann has a background in product development of medical monitoring, measurement, and prosthesis equipment. He received a BSE from Princeton, a PhD in Mechanical/Bioengineering from UC-Berkeley, and he is a graduate of the UW Executive Management Program.

Ron Howell

President and CEO of the Washington Research Foundation, Mr. Howell has shaped the most successful licensing program in the organization's history and guided WRF from being an organization that identified, protected, and licensed technologies to one able to foster early stage technology-based companies.

Jeremy Jaech

Cofounder of software startups Aldus Corp. and Visio Corp., Mr. Jaech is currently cofounder and CEO of Trumba Corporation, an early-stage software company that delivers event marketing technology over the web. He is a UW graduate with degrees in mathematics and computer science.

Bruce Montgomery

Senior VP, Head of Respiratory Therapeutics, Gilead Sciences. Dr. Montgomery founded and directed Corus Pharma before it was acquired by Gilead. He is on the Board of Directors of the Pacific Science Center and a Trustee of the Washington State Life Sciences Discovery Fund. Dr. Montgomery earned his BS and MD degrees from the UW.

Wednesday, February 28, 2007
